

# Logistics

## Workforce Management & HR Solutions

For the Way You Work Today

ANY SIZE | ANY BUSINESS | ANYWHERE

# Manage how the logistics industry works today

Automate time and attendance processes from anywhere in real-time, with powerful reporting and analytics.

## Key Features

### Staff Budget Planning

Plan your employee coverage ahead of time to ensure you stay within budget with our cost comparison tool.

### Mobile Geolocation Clocking

Your team can clock in with ease using their smart devices, whilst our geofencing system tracks their location, time and date.

### Connect Staff Online

Your employees can view their rosters, holiday requests, receive alerts and messages all from their own smart devices.

### Accurate Attendance

Our system automates manual processes and seamlessly tracks every employee's attendance.

### Automated Payroll

Automate your payroll system by electronically sending timesheets for your entire staff to your payroll system.

### Powerful HR Tools

Simplify HR processes with our timesaving system which features messaging, built in alerts, notifications, diary and real-time dashboards.

### Manage Days Off

Oversee any attendance deviations, absences and holiday requests in one convenient location.

### Go Paperless

Our online document management system is your new hub, connecting every department and employee in one place.

### Explore Data Insights

View any data you need, anytime, anywhere with our powerful dashboards and reports.

### Open Integration

All your key data is in one place and we can successfully partner with a range of fleet management software solutions.

“

Time Point is an excellent platform for HR and workforce management. Our business was able to transition over to Time Point Cloud with targeted start and end dates.

Our team was given training, parallel testing periods and the ultimate go live dates. Their customer support team was passionate about ensuring that any of our queries were responded to and resolved promptly.
