**SMART** WORKFORCE SOLUTIONS

## Our History

**2,500 Customers**     **300,000+ Employees**     **25 Years' Experience**     **5 Countries**     **30+ Partners**     **10+ Clocks**

Time Point established in 1996 specialise in providing biometric workforce management solutions to the retail, hospitality and service sectors.

Today, over 2,500 customers use our award-winning Time Point workforce management system. We have accumulated a wealth of experience over the past 25 years, delivering system editions which meet the precise needs that companies require, to manage their workforce. We create a partnership with all our customers

to ensure that we can continuously meet their needs. We are passionate that each of our customers will get a real return on their investment.

These savings are delivered through reduced wage costs, lower administration times, streamlined procedures and a contribution that further increases workforce efficiency within the business.

By working with Time Point, you're guaranteed to further increase your workforce productivity!

# SMART
# Clocking Solutions

We have a comprehensive range of clocking options for the way you work today. All designed to provide a range of solutions that will meet the needs of your entire business.

Intuitive and easy to use, Time Point employee clocking solutions, provide proven biometrics, contactless proxy cards readers and secure log in options that work on a range of clocking terminals.

Connect your entire business, with a range of powerful performance reports and dashboards all in real-time and accessible from anywhere. We pride ourselves in creating an end-to-end transformation of how a business works.

## EMPOWER
Empower your employees with one integrated system for HR and workforce management

## PROTECT
Protect your employees and your company by ensuring all policies and procedures are adhered to

## REDUCE
Reduce admin time and staff costs through increased efficiencies with real-time workforce analytics

## Connect and Manage Your Employees' Attendance Anywhere, Anytime

# TP-5 Biometric Facial Clock Terminal

With the verification of over one million faces around the world the TP-5 terminal has become one of the most accurate face recognition terminals, suitable for various environment and conditions. The TP-5 has a dual camera technology that enables IR and visual face recognition with a unique deep learning algorithm to achieve high accuracy and to identify fake faces by photos or images. It adapts to various conditions and employee heights to detect the users regardless of makeup, hairstyles, facial hair or expressions, glasses, head wear or face masks.

▶ Ultra-wide viewing angle (5-inch) IPS HD LCD screen gives users the best interactive experience

▶ The all-in-one waterproof design can adapt to outdoor and indoor environment applications

▶ Ultra-slim design with zinc alloy shell

▶ Each clocking transaction records the employees' start, end and/or break time and date

## Dual Camera for Live Face Detection

Smart LED light-based motion detection and auto-adjust to the lighting environment. Dual infrared and visible light HD cameras achieve an accurate and quick identification with live face verification.

# TP-5T Biometric Thermal Facial Clock

The TP-5T is a new AI-based facial recognition terminal with Infrared Thermal Temperature Detection & equipped with a dual-core Linux-based CPU and the latest BioNANO deep learning algorithm. The device supports up to 50,000 facial templates, and can authenticate users in less than 0.3 seconds. One of the most accurate face recognition terminals, suitable for various environments and conditions.

> New AI deep learning architecture and infrared technology with live detection.

> Facial recognition, RFID cards/Tags, PIN codes/passwords for flexibility and ease of use.

> Each clocking transaction records the employees' start, end and/or break time and date

> 5-inch screen with ultra-wide viewing angle (178 degrees)

> Infrared and visible light dual HD cameras to achieve accurate and quick identification and live face verification

## Fast, accurate and safe recording of employees' time & attendance

Temperature screening with thermographic technology (32 x 32 pixels) that is more accurate than standard thermopile technology (single-point).

With the verification of over one million faces around the world, the TP-5T has become one of the most accurate facial recognition terminals. The accuracy of the facial and thermal authentication isn't affected by makeup, hairstyles, facial hair, expressions, glasses, head wear or face masks.

# TP Employee Self-Service Clocking App

An employee self-service app that lets you work from anywhere. For example, if an employee wants to swap a shift or request time off, they can simply do so from within the app, without having to ask a manager to coordinate the process. Our time clock feature allows workers to clock-in from any device, but you can control where they're allowed to clock in from.

> The Time Point app can be downloaded to Android or iOS Smart Phones.

> Employees clock in using their secure username and password

> All shift and break start and end times are recorded and instantly updated to Time Point Cloud

> Connect with your entire workforce, send push notifications and approve requests online

> Employees can view their rosters, check their hours and send holiday absence requests

## Employees can clock from any location, at any time

Track the locations of all employee clockings. Ability to apply geo-fencing to limit the locations where employees can clock from.

# TP Desktop
# Clocking Solution

Time Point's desktop clocking system enables employees to easily and securely manage their time and attendance directly from their computers. Now, employees can take control of their own time, while companies can rest assured that data is more accurate than ever. The system can be programmed according to your companies specific needs, and is capable of showing the employee information such as upcoming schedules, accrued holidays, holiday entitlements and attendance records.

> Enable employees to securely access Time Point Cloud from their workstation, remotely or in their place of work

> Staff members can simply log in and record their start and finish times

> Optional location tracking to ensure staff members are where they are scheduled to attend work every day
> View company messages, updates, holiday balances and submit requests online

## Log on from any PC or Laptop Anywhere, at any time

All clockings automatically update the centralised timesheet, where employees' hours, absences, and overtime are calculated for you.

Our desktop clocking solution allows you to prepare your payroll data quickly and easily. Basic and overtime hours are calculated automatically, while late starts, early finishes, roundings and grace periods can all be built into shift rules to suit your working patterns.

# TP Tablet Clock
# Clocking App

Time Point's tablet clocking system is an effective way for management to track employees' time and attendance. By using Time Point's tablet clocking app staff members can easily clock in and out using a secure pin code.

> Staff members can simply enter their secure pin and Time Point Cloud records their start and finish times

> Verification takes less than a second. A beep and green or red light confirms acceptance or rejection

> Each clocking action records the employees' time and the date in real-time

## Reliable time and attendance system that captures attendance

Clocking in takes just a few seconds per employee, and unlike other software that runs exclusively on employee mobile phones, there is less room for unfortunate incidents that hinder employees from logging their attendance, such as losing their personal mobile device.

# TP Biometric
# Fingerprint Clock

Perfect for small or large organisations. Advanced optical fingerprint sensor for fast and accurate registration. The TP Biometric Fingerprint Clock is a high performance time and attendance terminal equipped with highly efficient dual-core 1G processor. It has a new generation optical advanced fingerprint sensor for higher performance fingerprint comparison in less than 0.5s. The friendly GUI and 2.4 inches TFT LCD makes it easy to use.
> Identification modes: Fingerprint, Password, Card

> Employees clock in and out for shifts and breaks using their assigned code

> Identification takes approximately 2/3 seconds with a message displayed to confirm acceptance or rejection of the transaction

> Every employee clocking event is recorded by time and date and processed in real-time

## High Performance Fingerprint & RFID Clocking Device

A popular and easy to use clocking solution, utilised by plenty of companies for fast and effective clocking.

Gain insights towards cost-effective scheduling. Eliminate buddy punching when employees clock in or out with a fingerprint scan using advanced biometric time clock technology.
